PROFILE

Dynamic Project Manager and Digitalisation Officer with extensive experience driving complex digital transformations within the Airbus ecosystem. Proven ability to lead engagements, manage contracts, and bridge the gap between customer requirements and technical R&D roadmaps. Expert in leveraging Data and Hybrid Intelligence (AI / Gemini) to optimize project performance, industrialize management practices, and ensure the delivery of high-quality digital products in Agile environments.

WORK EXPERIENCE

Airbus Customer Support Engineer & Digitalisation Officer (Temporary Position)

Airbus SAS, France (STTGO Program & Performance Mgt)

Feb 2024 – Current

- Project Management & Entry into Service: Manage project roadmaps for the Entry into Service of new Airbus products, ensuring strict alignment between stakeholder expectations, prerequisites, resource availability, and delivery timelines.
- Digital Gates & Risk Mitigation: Integrate real-time dashboards and Lean Kanban principles to animate digital gates, providing global STT leadership with total transparency into cross-domain project health, and actively drumbeating risk mitigation and action resolution.
- Digital Tool Landscape Focal Point: Act as the central focal point for digital tools across 9 global Airbus Training Centers, coordinating with on-site teams and L2/L3 support to rationalize local tools, harmonize documentation, and guarantee adherence to central strategy.
- Stakeholder Engagement: Drive a diverse community of stakeholders—including site digital leaders and IT, translating complex operational pain points into structured Business Requirement Dossiers (BRDs).
- Technical Deep-Dive: Developed a prototype application using Gemini to capture contract journeys, and successfully deployed new digital solutions (including MATe) to over 200 instructors globally, providing comprehensive IT support and product demos.
- Performance Monitoring: Synthesize multi-channel customer feedback (Qualtrics, ServiceNow) into actionable Customer Satisfaction Scores to challenge and influence the product roadmap and deployment strategy.

Airbus Digital Transformation Project Manager Intern

Airbus SAS, France (DWW Digital Workplace)

Mar 2023 – Sept 2023

- Analyzed contract deviation, performed risk assessment and root cause analysis through data and interviews to make several recommendations for improving contract management
- Proposed novel contract management tool for E2E management and worked on user stories and feature creation and prioritization for a Minimal Viable Product
- Improvement and harmonization of Service Line Agreement management, reporting and overall communication among internal stakeholders and suppliers
